Stock#: 93055
Map Maker: NASA

Date: 1969
Place: n.p.
Color: Color
Condition: VG+
Size: 10.5 x 10.5 inches (excluding mat)

Price: \$ 2,400.00

Description:

This evocative photograph, AS11-37-5475, taken on July 20, 1969, captures the stark black shadow of the Apollo 11 Lunar Module (LM) contrasting against the Moon's surface. The image was taken from within the LM during the historic lunar surface extravehicular activity (EVA) of astronauts Neil A. Armstrong and Edwin E. Aldrin Jr. Distinct impressions left by the lunar boots of the two pioneering astronauts are clearly visible in the lunar soil, marking their groundbreaking exploration of the Moon's surface.

Detailed Condition:

1969 chromogenic print on paper watermarked "A KODAK PAPER" on verso. The photograph mounted on a larger sheet of mat board, with the lower left corner cleanly delaminated, allowing examination of the photo's verso.
