### Description:

Detailed map of the US & Louisiana Territory, west to the region of the Padouca Indians along the Upper Missouri and covering most of Texas. Nice detail in the Missouri and Mississippi River Valleys, indicative of the French activity in the regions. A number of early western French Forts and Fur Trading Posts are shown. Nice detail throughout the Midwest and Great Lakes regions, especially Indian place names. Florida is an Archipelago. An excellent early colonial map. The map shows the early borders of the Colonies, with Georgia, the Carolinas, and Virginia each extending oddly misprojected territorial claims running to the Mississippi.
