Description:

Very rare double hemisphere map of the World, engraved by Henri Le Roy in Paris and published by Michael Van Lochum. The map is based on Hondius' World map of 1617. The map was the first to show Le Maire's Straits and the islands in the Pacific discovered by Le Maire and his explorations in New Guines. Hondius' map was also one of the earliest to show Hudson's Bay and the full course of the St. Lawrence in a curious configuration. A highly decorative map, which is extremely rare on the market. We have seen only two examples in the past 20 years.
