Description:

Rare set of 3 maps on a single sheet, including an imaginary view of the lands in Antarctica in the lower left.

The map at top is centered on Europe and does not include the western part of North America or the Pacific. It includes tables showing variations in longitude and latitude. The two maps below are polar projections. The Northern Hemisphere is an unusual chart with the continents of the Southern Hemisphere transposed over the map providing a visual depiction of the differences in landmasses. The map of the Southern Hemisphere shows the tracks of recent explorations and includes a "Plan et Vue des Terres du Cap de la Circoncision," an imaginary part of Antarctica.

A very unusual map. We have seen the separate maps offered for sale, but never the group on a single sheet.

Detailed Condition:

3 Maps on 1 Sheet. Wide clean margins
