Description:

Scarce chart of the Caribbean, Florida, Gulf Coast and Southeastern part of North America, with inset of the north coast of Cuba

Goos based his general chart of the West Indies, Gulf Coast and Southeast on the manuscript maps of Hessel Gerritsz, c.1631. In some ways it follows more than most the original by Gerritsz, as it is the first to include the inset of the north-west coast of Cuba. However, the map follows the work of Van Loon, 1661, in the Gulf of Mexico, and the Doncker, 1659, in its orientation of the southeast coastline, although Goos has improved the scale and depiction of the Outer Banks.

Detailed Condition:

Trimmed to the neat lines, with margins then extended, and it has been laid down on a Sanson map of Geographia Sacrae (which is visible when held up to the light), still very good.
