Description:

Detailed regional map, showing counties, towns, rivers, lakes, etc.

This map shows the various counties in outline color and names towns, rivers, lakes, islands, railroads, swamps etc.

One of the rarest of all US Atlases is the Rogers & Johnston *Atlas of the United States &c.* Conceived as a collaborative effort between W & AK Johnston (of London) and H.D. Rogers (of Boston), the project began with a wonderful wall map of the United States in 1856, which Rumsey describes as one of the most beautiful maps of the period.

Unfortunately, neither the wall map nor the subsequently produced atlas achieved wide commercial success, despite its fine detail and engraving style. Complete examples of the Atlas are rare on the market.
