Price: SOLD

Description:

Fine pair of celestial models illustrating the bright comet which transited the sky in March and April of 1742.

On the right is an image of the Celestial Sky, illustrating the various constellations visible in the sky at the time of the transit of the comet, which can be seen at the top left. On the left, is model of the solar system, illustrating the position of the comet.

The image presents a striking illustration, one of the best Celestial models of its time.
