Size: 22.5 x 20.5 inches
Price: SOLD

Description:

Mapping The Total Eclipse of 1706

Extremely rare Doppelmayr Eclipse map, overprinted on Homann's rare map of the Christian dominions of Europe (Europa Christiani Orbis Domina in sua Imperia, Regna, et Status exacte divisa . . .).

The map depicts the path of the solar eclipse across Europe on May 12, 1706. The central path of the eclipse is marked with a dotted line and shaded in blue, running through Spain, France, Germany, Poland, and beyond, with a note at the bottom left describing the path and duration of the eclipse from southwest to the northeast across Europe.

We are aware of two maps which address this eclipse. Peter Schenk's map appears on the market occasionally. This Doppelmayr/Homann map seems to be exceedingly rare.

Detailed Condition:

Old color. Minor toning.
