Size: 11.5 x 8.5 inches
Price: SOLD

Description:

Striking map of the state of North Carolina from Anthony Finley's General Atlas.

Anthony Finley's 1823 map of North Carolina is a beautifully detailed representation of the state during a transformative period in its history. Hand-colored by counties, each district is colored to make them easily distinguishable from one another, creating a vibrant and engaging visual representation of the state's political divisions.

The map does not include the newly created Davidson County (1822).

The 1820s was a period of significant change and growth in North Carolina. The state's population was expanding westward, and new infrastructure, including roads and canals, was being developed to support this growth.

Finley's 1823 map of North Carolina, with its meticulous detailing and vibrant hand-coloring, offers more than just a geographical representation of the state. It serves as a historical artifact, capturing a moment of growth, change, and tension in North Carolina's history. The counties, both old and newly established, are testament to the shifting political and social landscape of the early 19th century.
