**Place:** Paris  
**Color:** Outline Color  
**Condition:** VG+  
**Size:** 20 x 14 inches  
**Price:** SOLD

### Description:

Brue's map of Mexico, Texas and Upper California is one of the few atlas maps to name the Republic of Texas in the Title. Marvelous detail throughout Texas, New Mexico, the Rocky Mountains, California and the Plains. California's cartography is pre- Fremont, although some of the myths such as the second Salt Lake and the Rivers connecting them to the Ocean are gone. Nice detail along the West Coast, including the Spanish Missions and along the Colorado River. Now for the curious part. The colorist has ignored the dotted lines & colored the map as if it were issued in the late 1850s. This is a curious error, as Brue updated this map frequently & issued of pre- and post-Gadsden updates. Unquestionably pre-1845, although curiously colored!
