Description:

A fabulous geographical map of the United States, which also features excellent detail in the Western US, including explorer's routes, Indian Names, forts, roads, early Spanish Missions and other details. The map is color coded into 20 different geological types. Interesting early pre-Gadsden border with Mexico, oddly shaped Texas and California and other excellent transitional western information and borders. Meyer's maps are some of the most interesting mid 19th Century maps.
