Description:

One of the earliest obtainable views of Edinburgh, from an early example of Munster's Cosmography. A very detailed view of the fortified city and harbor. Munster's Cosmography was one of the most influential geographical works of the 16th Century. It was published in a number of editions over a half century and was continuously revised and updated to include new illustrations and updated information. Narrow side margins, just touching the neatline on the lower right part of the image, but sufficient for framing.
