Size: 21 x 15.5 inches

Price: SOLD

Description:

During the 1820s to 1840s, the major French cartographic publishing houses generated some of the most outstanding and historically significant maps of the American west. This map incorporates remarkable details from the early western explorations of Lewis & Clark, Long and others. There is a massive Missouri Territory. Oregon Territory extends to encompass much of British Columbia. Many fascinating placenames and mythical geological features in the west, including 2 salt lakes, each connected to San Francisco Bay by mythical rivers. Lots of Indians, early forts, and an early location of the Santa Fe Trail, although with an erroneous route. Texas is shown as a Republic and includes excellent detail. One of the most interesting atlas maps of the period. A full modern color example of this marvelous map.
