Part of South Western Colorado. Atlas Sheet No. 62 (C)

Stock#: 11664
Map Maker: Wheeler

Date: 1877
Place: New York
Color: Color
Condition: VG+
Size: 20 x 15 inches

Price: SOLD

Description:

Centered on Huerfano. Extends from West Mountain Valley and the Colfax Post Office and Tyndall Mt in the northwest to Fort Garlands and Trinchera Creek in the southwest to the Western Limit of the Great Plains, beyond the Old Telegraph Road from Pueblo to Trinidad.

The route of the Denver & Rio Grande RR is shown, with a number of stations located. The Gunnison & Beckwith Road is noted, as is Spanish Peak, The Butte Vy. Post Office, Cucharas, Cuerno Verde, etc. Dozens of place names and elevations, along with remarkable topographical detail.

In 1866, Joseph S. Wilson, the Commissioner of the General Land Office, assessed the mineral resources of the US and opined the proper development was a matter of the highest concern to the American people. On March 2, 1867, Congress authorized the first western explorations in which geology would be the principal objective: a study of the geology and natural resources along the fortieth parallel route of the transcontinental railroad, under the Corps of Engineers, and a geological survey of the natural resources of the new State of Nebraska, under the direction of the General Land Office.

Four major surveys resulted, generally referred to by their leaders on the ground, King, Hayden, Powell and Wheeler. In 1869, Lieutenant George Wheeler was Engineer Officer on the staff of the Commanding General of the Army's Department of California (which covered California, Nevada, and Arizona). Wheeler, then only 26, had graduated sixth in his class from West Point in 1866. In early June 1869, Lieutenant Wheeler was ordered to organize and equip a party to explore the country south and east of White Pine,

Nevada, as far as the head of navigation on the Colorado, to obtain data for a military map and to survey the possibility of a wagon road and select sites for military posts. In 1871, the Engineers sent Lt. Wheeler to explore and map the area south of the Central Pacific Railroad in eastern Nevada and Arizona. On his return from the 1871 expedition, Wheeler, convinced that the day of the pathfinder had ended, proposed a plan for mapping the United States west of the 100th meridian on a scale of 8 miles to the inch, expected to cost \$2.5 million and take 15 years. Congress authorized the program on June 10, 1872. The present work was included in the U.S. Geological Surveys West of the 100th Meridian, as part of the Atlas to accompany the Expeditions of 1873, 1874 & 1876.
