Stock#: 15381
Map Maker: Bode
Date: 1805
Place: Hamburg
Color: Hand Colored
Condition: VG
Size: 15 x 8 inches
Price: SOLD

Description:

Rare early 19th Century map of the World by Bode, one of the most famous astronomers of the 19th Century. Bode published his most famous illustrated work, *Uranographia*, in 1801, but is perhaps best known for publishing an empirical rule relating the mean distances of the Sun and the planets that had earlier been created by Johann D. Titius. It has since been called Bode's Law or the Titius-Bode Rule. This rare world map, which we have not previously encountered, reflects an up to date knowledge of the NW Coast of America, New Zealand and the discoveries in the Pacific, using an engraving style which is unique for the period. A nice example, with good margins.
