### Description:

Extremely rare facsimile of a portion of Martin Behaim's Globe of 1492, showing the region from Madeira and Grand Canary Island, with America conspicuously absent from the map. The map shows a section of Martin Behaim's globe, one of the earliest surviving globes and the perhaps the most famous of all pre-Columbian globes, which exists in only a single example.

Once in a great while, we experience the joy of owning something not only rare but truly fascinating. The map offered here is something truly remarkable. Initially offered in a rare in Cladera's *Investigaciones históricas sobre los principales descubrimientos de los españoles en el mar oceano en el siglo XV, y principios del XVI* (Madrid: Antonio Espinosa, 1794), this edition of the map appeared in *Diplomatische*
