Description:

Decorative full color example of Munster's map of Europe, from an early edition of Munster's *Geographia*.

Munster was one of the most influential map makers of the 16th Century and the success of his *Geographia* (first issued in 1540) and *Cosmographia* (1545 and after) resulted in a wide spread dissemination of his maps throughout Europe. While we cannot state with certainty that this is an old color example of the map, the color is very well executed, in the style of Ptolemaic maps of the period.

Detailed Condition:

Manuscript annotations on verso.
