Condition: VG
Size: 16.5 x 12.5 inches

Price: SOLD

Description:

Fine map of the midwest, showing the confluence of the Missisippi, Missouri and Ohio Rivers.

The map comprises a section of the Italian edition of John Mitchell's seminal map of North America, bounded by the Missouri, Osage and Arkansas Rivers in the West and extending nearly to the Alleghany Mountains in the East. The map was part of Zatta's Atlante Novissimo, one of the great Italian maps of North America in the late 18th Century. The map includes the same details as Mitchell's map, including nice detail of the forts and settlements along the Missouri and Mississsippi Rivers, and details the locations and settlments of the Cherokees in Kentucky and Tennessee. A wonderful regional map, one of the best separate maps of the region during the era. John Mitchell's map of North America was the single most important American map of the 18th Century and is the foundation for virtually all boundary disputes and treaties beginning with the French & Indian War. It was drawn from the first available English and Indigenous surveys and includes remarkable detail regarding towns, roads, rivers, mountains and other regional features.
