Stock#: 19886
Map Maker: Cary
Date: 1821
Place: London
Color: Hand Colored
Condition: VG+
Size: 20.5 x 18 inches
Price: SOLD

Description:

Rare 1821 edition of the first edition of Cary's map of the Southeastern United States, being the only edition to include Alabama and Mississippi.

This is the first edition to eliminate the massive depiction of Georgia, which extended from the Atlantic to the Mississippi River, as it existed immediately prior to the creation of Mississippi Territory (created in 1798, but not widely depicted on maps for another decade).

Many remarkable notes are present, including the hunting grounds of the Western Party and Six Villages along the Mississippi and the Eastern Party due east thereof, between the Yasoo and Tombechbe Rivers, notes regarding the destruction of Chatchioomas and Fort Francois in 1736 and 1729 respectively, and a host of other interesting notes in Western Georgia. The region controlled by the Chickasaws and Upper Creeks names dozens of villages and other places and includes early roads. The Cherokee region is also well depicted. Many roads are shown in the Carolinas and some in Tennessee as well. Many early forts are depicted.

East and West Florida still appear (although not accurately so), the latter of which was still under Spanish control until 1812 although claimed as part of the Louisiana Purchase in 1803. In Florida, Fort St. Marks, Apalacha Fort, and the roads across from St. Augustin are shown, with a note that the Apalachees Villages are now deserted. Southern Florida is Ancient Tegesta and The Promontory. A Lake and River system
