Description:

Rare German edition of Pierre Duval maps of the Great Lakes, Canada and Northeast, based upon Sanson's earlier maps of the region. The map appeared in Johann Hoffmann's *Geographiae Universalis*, first issued in Nurmberg in 1678.

Excellent example of the open ended Great Lakes to the West. Clearly shows a Northwest Passage through Hudson's Bay. Extends south to Virginia and names Florida. This is the second state of the map, with the addition of several Indian Tribal names in the West.
