### Description:

Fascinating Study of scientific data.

In addition to the items identified in the partial title of the map, there is information on the Point of the Compass on which the sun rises and sets, for every five degrees of Latitude and for every 5 degrees of the Sun's declination (and includes a system for finding longitude and latitude during the year. An important scientific/navigational chart. Printed for Robert Sayer in Fleet Street, London, January 10, 1774, for Dunn's *A New Atlas of the Mundane System; or of Geography and Cosmography*.
