Le Table des neuses lesquelles on appelle isles d'occident & d'Indie pour divers regards. [1st Map of the American Continent]

Stock#: 25845
Map Maker: Munster
Date: 1565
Place: Basel
Color: Hand Colored
Condition: VG
Size: 13.5 x 10.5 inches
Price: SOLD

Description:

Previously unrecorded variant edition of Munster's map of America, the earliest map to show all of North and South America in a true continental form.

Munster's map of America is the earliest map to show all of North and South America in a true continental form. The first edition of the map appeared in Munster's *Geographia*, first published in 1540. However, it was the map's inclusion in the 1544 edition of Munster's *Cosmographia* that forever caused America to be the name of the New World, perpetuating Waldseemuller's choice of names in a popular and widely disseminated work.

Munster's map is the earliest map to show all of the continent of America and the first to name the Pacific Ocean (Mare Pacificum). The depiction of North America is dominated by one of the most dramatic geographic misconceptions to be found on early maps—the so-called Sea of Verrazzano. The Pacific cuts deeply into North America so that the part of the coastline at this point is a narrow isthmus between two oceans. This was the result of Verrazzano mistaking the waters to the west of the Outer Banks, the long barrier islands along North Carolina as the Pacific. The division of the New World between Spain and Portugal is recognized on the map by the Castille and Leon flag planted in Puerto Rico, here called Sciana.

The map includes a host of firsts, too many to include in this description. Includes a very early appearance of the Straits of Magellan, along with his ship *Victoria* in the Pacific. Earliest appearance of Japan on a map, predating European contact and based solely legends, such as Marco Polo. The Yucatan Peninsula is

shown as an Island. Lake Temistan empties into the Caribbean. The map depicts cannibals in South America and names Florida.

Includes an early appearance of the Straits of Magellan, along with his ship Victoria in the Pacific. First appearance of Mare Pacificum on a map. Earliest appearance of Japan on a map, predating European contact and based solely on legend. The Yucatan is shown as an Island. Lake Temistan (unnamed in this state of the map) empties into the Caribbean. The mis-information provided by Verazanno is perpetuated. The map depicts cannibals in South America and names Florida.

The present example is likely the 1565 edition, which Burden notes, but was not able to locate in his exhaustive research. The map includes a different title than the earlier editions seen by Burden.

Perhaps most noteworthy is the extensive annotation on the verso, dated and signed in 1633.

Detailed Condition:

Extensive annotation on verso, dated 1633.
