Description:

Excellent little map of North America, showing California as an island, open Great Lakes and detailed cartography within the interior of North America, based upon the reports of the French Jesuits. The Mississippi River is based upon a pre-La Salle description, pushed well to the west and without any real knowledge of its course. The Rio Grande flows into the Gulf of California. The projection of California is based upon the second Sanson model. Small hole near modern Ohio has been backed with old paper, but generally not a good repair. Normally a \$500.00 map. McLaughlin 89, state 2.
