Color: Color
Condition: VG
Size: 36 x 24 inches
Price: SOLD

Description:

Rare separately issued chart of part of the South Atlantic, focusing on the prevailing currents and winds, as observed by Matthew Fontaine Maury, then serving as Lieutenant in the U.S. Navy.

Rare Sheet of the Southeastern part of Argentina, including T Tierra Del Fuego, Palmer's Land, South Shetland Islands, Faulkland Islands, which was a part of Maury's seminal work on the Oceans currents and related atmospheric phenomena, which commenced in 1847, with the publication of his map of the currents of the North Atlantic (Schwartz & Ehrenberg 278) and culminated with The Physical Geography of the Sea, published in 1855. While preparing the charts Maury sought the cooperation of mariners from many nations, getting them to report to him their regular observations of winds and currents, which he

either added or corrected on his own charts. This was the Age of the great Clipper Ships, and their masters prized Maury's charts as by following their wind and current directions, they were able to cut many days off their voyages from North American ports to the Far East, as also the Clippers racing to and from New York and San Francisco.

Maury was the chief Naval Officer in charge of charts from 1843 to 1861. His work describing seasonal winds and currents was conceived largely outside conventional academic circles. Maury was made an honorary member of the Boston Marine Society, where his portrait was hung, and later turned upside down when he later elected to join the Confederacy during the American Civil War.
