**Description:**

Rare separately issued coast survey chart of the Harbor of Beaufort, North Carolina, as corrected to April 1864.

The map extends inland to Moorhead City and provides an extensive set of sailing directions, soundings, and tidal information.

Separately issued examples of Coast Survey maps are rare on the market. The present example does not include the page no at the top left corner, which distinguishes it from the examples which appeared in the annual report. The map was also engraved and has a much finer engraving quality and appearance than the editions which appeared in the official reports.
