La Table des Isles neusues, lesquelles on appelle isles d'occident & d'Indie pour divers regardz.

Stock#: 33214gm
Map Maker: Munster
Date: 1552
Place: Basel
Color: Uncolored
Condition: VG+
Size: 13.5 x 10.5 inches
Price: SOLD

Description:

Nice example of the 1552 edition of Munster's map of America, the earliest map to show all of North and South America in a true continental form.

The present example is from the Collection of Glen McLaughlin, whose collection is described in the *Mapping of California as an Island*. Certification letter is available on request.

Munster's map of America is the earliest map to show all of North and South America in a true continental form. The first edition of the map appeared in Munster's *Geographia*, first published in 1540. However, it was the map's inclusion in the 1544 edition of Munster's *Cosmographia* that forever caused America to be the name of the New World, perpetuating Waldseemuller's choice of names in a popular and widely disseminated work.

Munster's map is the earliest map to show all of the continent of America and the first to name the Pacific Ocean (Mare Pacificum). The depiction of North America is dominated by one of the most dramatic geographic misconceptions to be found on early maps-the so-called Sea of Verrazzano. The Pacific cuts deeply into North America so that the part of the coastline at this point is a narrow isthmus between two oceans. This was the result of Verrazzano mistaking the waters to the west of the Outer Banks, the long barrier islands along North Carolina as the Pacific. The division of the New World between Spain and Portugal is recognized on the map by the Castille and Leon flag planted in Puerto Rico, here called Sciana.

La Table des Isles neusues, lesquelles on appelle isles d'occident & d'Indie pour divers regardz.

The map includes a host of firsts, too many to include in this description. Includes a very early appearance of the Straits of Magellan, along with his ship *V ictoria* in the Pacific. Earliest appearance of Japan on a map, predating European contact and based solely legends, such as Marco Polo. The Yucatan Peninsula is shown as an Island. Lake Temistan empties into the Caribbean. The map depicts cannibals in South America and names Florida.

Includes an early appearance of the Straits of Magellan, along with his ship *Victoria* in the Pacific. First appearance of *Mare Pacificum* on a map. Earliest appearance of Japan on a map, predating European contact and based solely on legend. The Yucatan is shown as an Island. Lake Temistan (unnamed in this state of the map) empties into the Caribbean. The mis-information provided by Verazanno is perpetuated. The map depicts cannibals in South America and names Florida.

The present edition is from the first French edition of Munster's *Cosmographia*, and can be distinguished from other later French editions by the presence of the place name "Temistan" in Central America and the title of the map. A seminal map for American Collectors.
