## Nova Totius Terrarum Orbis Tabula

**Stock#:** 33401  
**Map Maker:** De Wit / Colom  
**Date:** 1655 circa (1663 ca)  
**Place:** Amsterdam  
**Color:** Hand Colored  
**Condition:** VG  
**Size:** 25 x 21 inches  
**Price:** SOLD

### Description:

Extremely rare Frederick De Wit edition of Arnold Colom's map of the World, first published by Colom circa 1655.

Colom's double hemisphere world map was first issued in about 1654 (Koeman) or 1655 (British Library). The map appeared in Arnold Colom's *Zee-Atlas*, a sea atlas of the world issued in the mid-17th Century. As noted by Shirley:

There are two hemispheres which are surrounded by six robust statuesque figures typically representing night and day and the four elements; each except for Mother Earth, proudly unclothed.

The map is very rare and rarely appears in good condition. When De Wit acquired the plate, he reworked the map by replacing the original title above the map (*Nova Delineata Totius Orbis Terrarum Auctore A. Colom*) with a new title, which is engraved below the top neatline. The lower right cartouch now includes De Wit's name.

De Wit also makes a number of cartographic changes. Australia is significantly revised and updated, showing the significant cartographic advances in its depiction over the prior decade.

On the West Coast of America, California is completely re-engraved and a curiously vertical Northwest coast of America is shown, with the straits of Anian relocated to the same latitude as Button's Bay. The curious Northwest Coastline of America, which traversed the Pacific to the West toward Asia is completely

removed.

Virtually all evidence of Terra Australis Incognita has been removed (a bit remains above the right lower cartouche), but De Wit leaves the name in both hemispheres, despite not illustrating the southern landmass.

In Asia, De Wit completely revises the coastline of northwestern Asia. Japan is significantly enlarged and revised and the coastline of Korea is completely reworked to form a more contemporary peninsular shape. Similarly the coast of China is modernized, as is the Malaysian Peninsula and Straits of Malacca.

Both the De Wit and Colom editions of this map are extremely rare. This is the first example of De Wit's edition of the map to appear on the market in a number of decades.

**Detailed Condition:**

Minor repairs along the folds along with a few repaired tears and small areas repaired in facsimile.
