### Description:

Fine example of this scarce map of the island of Sardinia, published by Coronelli in his *Corso Geographico*.

Vincenzo Coronelli apprenticed as a Xylographer, before joining the Convental Franciscans in 1665. In about 1678, after studying Astronomy and Euclid, Coronelli began working as a geographer and was commissioned to make a set of Terrestrial and Celestial Globes for Ranuccio II Farnese, the Duke of Parma, which were 5 feet in diameter. Coronelli was next invited to Rome to construct a similar pair of Globes for Louis XIV. From 1681 to 1683, Coronelli lived in Paris, where he constructed a pair of 10 foot diameter globes for the King, at a weight of nearly 4000 pounds.

The fame and importance of Coronelli's globe led to the production of a 42 inch diameter globe in 1688, where complete of examples reside in a number of major institutional collections around the world.
