### Description:

Rare Armenian language map of the World. California is shown as an island. The map includes sailing ships, compass roses, incomplete Australian and New Zealand coastlines and a partial Terra Australis. While the cartography of the map is 17th Century, we believe the map was issued in the latter part of the 18th Century. One repaired tear on the left margin entering the printed image by about 2.5 inches, but generally a very nice example.
