### Description:

Nice example of this scarce map of Avignon and environs, with north at the bottom, published by Coronelli in his *Corso Geographico*.

Includes a decorative cartouche and a number of coats of arms.

The map shows Coronelli's finely executed topographical detail, illustrating the mountains and rivers in the region.

Vincenzo Coronelli apprenticed as a Xylographer, before joining the Conventual Franciscans in 1665. In about 1678, after studying Astronomy and Euclid, Coronelli began working as a geographer and was commissioned to make a set of Terrestrial and Celestial Globes for Ranuccio II Farnese, the Duke of Parma which were 5 feet in diameter. Coronelli was next invited to Rome to construct a similar pair of Globes for Louis XIV. From 1681 to 1683, Coronelli lived in Paris, where he constructed a pair of 10 foot diameter globes for the King, at a weight of nearly 4000 pounds.

The fame and importance of Coronelli's globe led to the production of a 42 inch diameter globe in 1688, for which complete examples reside in a number of major institutional collections around the world. Separate globe gore sheets from this famous globe periodically appear on the market. Coronelli worked for a number of years as a Geographer and Theologian, before returning to Venice in 1705, where he published his *Atlante Veneto* and *Corso Geographico* and founded the *Accademia Cosmografica degli Argonauti*.
