Description:

Finely executed map of the world, which first appeared on the title page of the later editions of Peter Apian's *Cosmographia*, beginning in 1592.

The map derives from Mercator's World map, although interestingly, Korea is shown as a peninsula, making this one of the earliest maps to show Korea attached to the mainland of China.

Includes a massive Terra Australis Incognita, well before the discovery of Australia. Finished with a strapwork border and compass rose.
