Jasper and Vicinity from General Information by Capt W.E. Merrill, Chief of Topographical Engineers Printed in the Field by Capt. William Margedant's Quick Method for Field Map Printing. July 24, 1863

Stock#: 45290
Map Maker: Merrill

Date: 1863
Place: Tennessee
Color: Hand Colored
Condition: VG
Size: 22.5 x 17.5 inches

Price: \$ 14,500.00

Description:

Early Photography & Battlefield Mapmaking Technology!

Very rare and important Union Civil War "black map" or "sun map," printed in the field with a photographic process utilizing a mobile laboratory and darkroom.

The map is centered on Jasper, Tennessee, which lies 19 miles west of Chattanooga.

This rare civil-war era field map was produced in support of the Chickamauga Campaign preceding the Battle of Chickamauga fought September 19-20, 1863. The battle was fought between the Army of the Cumberland under Major General William Rosecrans and the Confederate Army of Tennessee under General Braxton Bragg, and was named for Chickamauga Creek, which curves near the battle area.

William Margedant's photographic process (today called a "contact print") was employed early in the war by a team of topographical engineers and draftsmen to provide commanders with maps that could be updated frequently using:

..."a fac-simile photo-printing device invented by Captain Margedant, chief assistant. This consisted of a light box containing several india-rubber baths, fitting into one another, and the proper supply of chemicals. Printing was done by tracing the required map on thin paper and laying it over a sheet coated with nitrate of silver. The sun's rays passing through the tissue

paper blackened the prepared paper except under the ink lines, thus making a white map on black ground. ... The process, however, was expensive, and did not permit the printing of a large number of copies ; therefore these maps were only issued to the chief commanders. "
(Van Horne, Thomas B., History of the Army of the Cumberland. Cincinnati: Robert Clarke & Co., 1875, vol. 2, p. 456 -8.)

Rarity

Less than a half dozen copies of "black maps" are recorded as having been printed with Margedant's revolutionary photographic process.

OCLC locates only 2 surviving examples of this type of map, a map of *Part of Cobb Co. Ga. . . . June 19* (1864) and one other copy of this field map of *Jasper and Vicinity* (both at the Clements Library, University of Michigan).

Detailed Condition:

Rivers bear traces of blue coloring, rail lines are colored red. Printed on linen as issued. 1.5" square missing at top right. Some bright spots due to overexposure when printed. Traces of original folds. Stained through verso.
