Description:

Rare Sea chart showing part of the Philippine Islands, Palawan, Borneo and contiguous islands, published by Laurie & Whittle in London.

The chart appeared in Laurie & Whittle's *East India Pilot* . . .

The chart is one of the most detailed sea charts of the region published in the 18th Century, and includes a number of annotations, including the tracks of a number of early explorers in the region.

At the edges of the chart, there are a number of profile views, showing coastal features, along with plans of the Harbor of Silla in Mindanao, based upon the a chart by Jonathan Watson in 1762 and the Bay of Sooloo, taken by the Pecoock in January of 1761.

The chart is very rare on the market. This is the first example we have seen in more than 15 years.
