**Date:** 1834  
**Place:** New York  
**Color:** Hand Colored  
**Condition:** VG+  
**Size:** 12 x 11 inches  
**Price:** SOLD

#### Description:

#### *A Desirable Map of the New York City Metropolitan Area*

Striking full color example of David Burr's map of New York City, which was issued separately and also appeared in his *Universal Atlas*, first issued in 1836.

The map covers the areas of Kings and Queens County, Westchester County, Manhattan, and Monmouth, Middlesex, Essex, Morris and Bergen Counties in NJ. Shows roads, rivers, towns, islands, shoals, creeks, a town plan for NYC and other details.

One of the few maps of its type to appear in an American Atlas. Burr's Atlas was perhaps the most elegant American commercially published atlas of its time, utilizing wonderful wash colors and elegant engraving style. Burr studied under Simeon DeWitt in New York. His first atlas was an Atlas of New York State, the second state atlas to be issued in the US (after Mills Atlas of South Carolina in 1826). In the 1830s, he served as topographer for the US Post Office, producing a series of rare and highly sought after large format state maps during this period. Later, he was appointed as the Geographer of the House of Representatives, where he served during the later part of the 1830s.
