The German Ocean, and Baltick Sea, with the Coast of England, Scotland, Holland, Norway

Stock#: 47414
Map Maker: Senex / Halley / Cutler
Date: 1728
Place: London
Color: Uncolored
Condition: VG
Size: 20 x 23 inches
Price: \$225.00

Description:

Scarce sea chart of the Scandinavian, Baltic, and North Sea coastlines. The map depicts the Dogger Bank, Well Bank, White Bank, White Water, and Jutts Riff, all with soundings.

This very rare work was a collaborative effort of a number of the leading cartographic and scientific names of the period, including Sir Edmund Halley, John Senex, Nathaniel Cutler, Steven Parker and Daniel Defoe, whose names are frequently associated with this work.

The sea atlas was developed by Senex and Harris to compete with Mount & Page's wildly popular English Pilot sea series. It was published under the name *Atlas Maritimus et commercialis, or A general view of the world...* (London: James and John Knapton et al., 1728).

In 2015, a complete example of the atlas sold for £27,500 at Christie's in London.

While the collaboration was impressive, the atlas never achieved the same commercial success. As such, the maps are quite scarce on the market. The full name of the book was the

Atlas maritimus & commercialis, or, A general view of the world, so far as relates to trade and navigation : describing all the coasts, ports, harbours, and noted rivers ... : to which are added sailing directions for all the known coasts and islands on the globe, with a set of sea charts, some laid down after Mercator, but the greater part according to a new globular projection
