of sea charts and maps, including a large folio format sea-chart of France, the *Neptune Francois*. He also produced a number of sea-atlases of the world, e.g., the *Atlas Maritime* and the *Hydrographie Francaise*. These gained fame, distinction, and respect, all over Europe and were republished throughout the 18th and even in the succeeding century.

Bellin also came out with smaller format maps such as the 1764 *Petit Atlas Maritime*, containing 580 finely detailed charts. He also contributed many of the maps for Bellin, and contributed a number of maps to the 15 volume *Histoire Generale des Voyages of Antoine François Prévost* or simply known *l'Abbe Prevost*.

Bellin set a very high standard of workmanship and accuracy, thus gaining for France a leading role in European cartography and geography. Many of his maps were copied by other mapmakers of Europe.
