**Place:** Leiden  
**Color:** Uncolored  
**Condition:** VG+  
**Size:** 21 x 17 inches  
**Price:** SOLD

### **Description:**

Decorative map of America, showing California as an island, published by Pierre Vander Aa in Leiden.

Shows one open Great Lake, a large wide South America, Straits of Anian, with no northwestern coastline for North America.

California is shown as an Island in the early Sanson form with a nearly flat top beginning at C. Mendocino. Nova Albion has been inserted in the northern part of the island.

Tooley calls the map of interest for the innovative insertion of Village des Canots between P. de Carinde and P de la Conception. Anian and Straet Anian appear far north of California.
