Description:

Scarce regional map of the Diocese of Senlis, with large inset plans of Senlis and Cresapy, by Guillaume De L'Isle, the most important and influential French mapmaker of the 18th Century. The map includes two large alphabetical tables, listing over 100 places with grid coordinates, a virtually never seen on 18th Century maps. At the bottom there is an advertisement and key to the symbols used on the map. The map is on a remarkably detailed scale for De L'Isle maps, showing towns, churches, woods, the smallest of roads and a host of other fine details. Attractive coat of arms at the top. An unusually early topographical map.
