National Map of the Territory of the United States From The Mississippi River To The Pacific Ocean. Made by the authority of the Hon. O. H. Browning Secretary of the Interior. In the Office of the Indian Bureau Chiefly For Government Purposes under the direction of the Hon. N.G. Taylor, Commisr. of Indian Affairs & Hon. Chas E. Mix Chief Clerk of the Indian Bureau . . . 1867.

Stock#: 51293
Map Maker: Keeler
Date: 1867
Place: Philadelphia
Color: Hand Colored
Condition: VG
Size: 47.5 x 57.5 inches
Price: SOLD

Description:

Fine example of Keeler's "National Map", one of the most influential maps of the American West published immediately following the conclusion of the Civil War, including the 30 page *Notes to Accompany Keeler's Map of the U.S. Territory*

The map provides a monumental compilation of data from many governmental sources and is color coded to show the locations of Gold, Silver, Copper, Quicksilver, Iron and Coal. Completed and proposed railroad lines are shown, as are Land Offices, Forts and Military Posts.

Keeler's map has been described as the largest, finest and most detailed map of the West as it was then known. "In 1867, seeking to take advantage of public interest in all aspects of the West, but particularly the railroad routes, William J. Keeler, an engineer working in the Indian Bureau, published a large, attractive map of the entire country west of the Mississippi. As a product no doubt of Keeler's own employment with the Indian Bureau, the various Indian reservations were clearly shown and identified by a color scheme, an early use of this thematic device." (Martin).

Keeler's map of the west is among the most important maps of the period. As noted by Wheat,

National Map of the Territory of the United States From The Mississippi River To The Pacific Ocean. Made by the authority of the Hon. O. H. Browning Secretary of the Interior. In the Office of the Indian Bureau Chiefly For Government Purposes under the direction of the Hon. N.G. Taylor, Commisr. of Indian Affairs & Hon. Chas E. Mix Chief Clerk of the Indian Bureau . . . 1867.

Keeler's map extends from Cincinnati to the Pacific, and from about the 32nd to the 42nd parallel--or from Ft. Reno in Wyoming to Ft. Filmore in New Mexico; It has a superior showing of new military data, being in advance even of the Colton maps (for example, Ft. Fetterman on the upper North Platte, Camp Douglas near Great Salt Lake City, Ft. Reynolds, Ft. Morgan, and Ft. Sedgwick in Colorado). It also displays, with color symbols, deposits of gold, silver, coal, copper, and quick silver from eastern Colorado to California--information . . . economically pertinent to railroad operations. But primarily it is interesting for railroad routes west of the Missouri; The Union Pacific is shown completed as far as Fort D.A. Russell, near Cheyenne, the projected route then going past Ft. Sanders on the Laramie, and past Ft. Hallbeck to Bitter Creek; alterations of the route made west of the Laramie by Dodge and his engineers in the summer of 1867 had not yet come to Keeler's attention. The route goes on by Echo Canyon to the Great Salt Lake Valley, then swings north around the lake to the Humboldt, somewhere in the stretch becoming the Central Pacific R.R. The latter, somewhat prematurely, is shown completed down the Truckee almost to the great bend of that river.

What appears on this map as the "U.P.R.W.E.D." is represented as completed all the way to Ft. Wallace, near the west edge of Kansas (That was the expectation of the Company in the summer of 1867). Just beyond, inside the Colorado line, this road branches, one route going northwesterly to Denver, the other southwesterly to Arkansas and the Purgatorie, thence to Ft. Union and Albuquerque, and on to California via the route later actually employed by the Atchison, Topeka & Santa Fe. From Albuquerque yet another line follows down the Rio Grande, with an extensive western branch turning off at Ft. McRae to seek out California via the Gila. This latter branch is not labelled. Keeler's railroad map is full of factual information, but is also full of hope and faith.

William Keeler's map of the Western US is regarded as a landmark in the mapping of the Western United States, providing the best detailed and comprehensive look at the Western Railroad System after the close of the Civil War. His large map was widely distributed and its influence on the history of the Mapping of the Transmississippi West is profound.

Detailed Condition:

Lithographed on four sheets. Mounted on linen. With original covers. Full original color. Bound in original
