### Description:

Decorative Air France Map Poster by Lucien Boucher, dated June 1948.

Presents a lively pictorial map of the World, with Air France routes extending to Buenos Aires, the Eastern United States, Tehran, Calcutta, Shanghai, Manila, Saigon, Hong Kong, Hanoi, Madagascar, Mauritius and East Africa.

This edition of the map, with the brown background color, is apparently quite rare. The map is very similar to the 1947 edition of the map, which is apparently the earliest to extend across the entire world, with earlier editions not including much of North America and a large part of Australia.
