**Condition:** VG  
**Size:** 32 x 23.5 inches  
**Price:** \$ 475.00

### Description:

#### *Postal Services In Mexico -- From Air Mail to Horseback*

Rare separately published map of the Postal Roads within the Mexican State of Yucatan, published in the year following the creation of the Dirección General de Correos y Telegrafos as a consolidation of the Mexican Postal Service and the Mexican Telegraph Service.

One of the earliest postal route maps to focus on this state, illustrating the broad range of transportation modes used for mail delivery and the still relatively limited distribution available to local residents in the first half of the 20th Century in Mexico.

The map is quite remarkable, in that it integrates everything from Air Mail Services to mail routes serviced by foot and by horse.

The map explanation notes the following features:

- Principal and Final Post Routes
- Routes serviced by Foot
- Routes serviced by horse
- Routes serviced by automobile
- Routes serviced by tram
- Railroads
- Nautical Routes

1934**

- National Air Routes
- International Air Routes

**Dirección General de Correos y Telegrafos**

In 1933, by presidential order, the Postal service took control of the telegraph service in Mexico, creating the office "Dirección General de Correos y Telegrafos" (Executive Director of Postal Service and Telegraphs). In 1942, the President ordered the separation of the postal service and telegraph into two entities

**Rarity**

The map is apparently quite rare. We are unable to locate any other examples.
