Italia XIX Nova Tabula

Stock#: 57326
Map Maker: Munster
Date: 1545
Place: Basle
Color:
Condition: VG
Size: 13 x 10.5 inches
Price: SOLD

Description:

Finely colored example the 1545 edition of Munster's modern map of Italy, one of the earliest obtainable modern maps of Italy not based on Ptolemy.

The map includes Sicily, Corsica, Sardinia and the contiguous Adriatic coastline.

Munster's *Geographia* (first published in 1540) and his later *Cosmographia* were cartographic landmarks. The *Geographia* included not only Ptolemaic maps, but also a number of landmark modern maps, including the first separate maps of the 4 continents, the first map of England and the earliest obtainable map of Scandinavia. The *Cosmographia* (first published in 1544) was the earliest German description of the world and a major work in the revival of geographic thought in 16th-century Europe. Altogether, about 40 editions of the *Cosmographia* appeared between 1544 and 1628.

Munster dominated cartographic publication during the mid-16th Century. Munster is generally regarded as one of the important map makers of the 16th Century. Munster was a linguist and mathematician, who initially taught Hebrew in Heidelberg. He issued his first mapping of Germany in 1529, after which he issued a call geographical information about Germany to scholars throughout the country. The response was better than hoped for, and included substantial foreign material, which supplied him with up to date, if not necessarily accurate maps for the issuance of his *Geographia* in 1540.

Detailed Condition:

A number of wormholes at centerfold, expertly restored.
