**[Sir Francis Drake Honored By The Natives of the Island of California] Einwohner auff
der Insul California**

The image is a curious conflation of myth and fact, as the concept of the "Island of California" did not exist in Drake's lifetime, but was the prevailing geographical conception of California in 1688, when Happel's book was published, and, of course, its unlikely that Drake's reception was remotely similar to Happel's image.
