Aeroplane View of Glacier National Park Montana and Waterton Lakes Park Alberta

The Great Northern Railway ran from Saint Paul, Minnesota, to Seattle, Washington. It was the creation of 19th-century railroad entrepreneur James J. Hill and was developed from the Saint Paul & Pacific Railroad. The Great Northern's route was the northernmost transcontinental railroad route in the U.S. This map was created with an appearance liking to that of a watercolor painting. Depth is given by way of mountain peaks, rivers, valleys, and lakes. Auto roads and trails distinguish routes one can take when exploring the two parks. Chalets, hotels, tent camps, mountain passes and peaks are all noted throughout the map.

The view is apparently quite rare on the market.
