Yellowstone National Park

Stock#: 61377
Map Maker: U.S. Geological Survey
Date: 1878
Place: Washington
Color: Uncolored
Condition: VG
Size: 28.5 x 33.5 inches
Price: SOLD

Description:

Second Hayden Survey of Yellowstone National Park

Nice example of this fine large map of Yellowstone, prepared by the Department of the Interior. The map was prepared in connection with the second Survey of the Park by Ferdinand V. Hayden, the first coming in 1872.

The map shows the entire park from the Montana state line south to well beyond Yellowstone, Shoshone, Lewis and Heart Lakes, and from the border with Idaho east to the Yellowstone Range and the east fork of the Yellowstone River. Terrific detail of topography with contour intervals at 100 feet, watershed and numerous features, all at a scale of 1 inch = 2 miles. Names the Upper, Shoshone, Gibbon, and Heart Lake Geyser Basins, Mud Geysers, Mammoth Hot Springs, and much more.

The primary triangulation was undertaken by A.D. Wilson, with a secondary triangulation and topography by Henry Gannett, M.E, under the direction of F.V. Hayden.

Yellowstone National Park

Hayden Surveys in Yellowstone

The Hayden Geological Survey of 1871 explored the region of northwestern Wyoming that became Yellowstone National Park in 1872. It was led by geologist Ferdinand Vandever Hayden. In the spring of 1871, Hayden selected the members of the survey team, 32 in all from among friends and colleagues, seven previous survey participants and a few political patrons. Included in the party was William Henry Jackson, his photographer from his 1870 survey and Thomas Moran, a guest artist arranged by Railroad financier Jay Cooke.

The survey was America's first federally funded geological survey into the Yellowstone region of northwestern Wyoming, given directions by President Ulysses S. Grant's Secretary of Interior Columbus Delano. The following year, Hayden and his work, *Preliminary Report of the United States Geological Survey of Montana and Portions of Adjacent Territories; Being a Fifth Annual Report of Progress* was instrumental in convincing Congress to establish Yellowstone as the first U.S. National Park, aided by Jackson's stunning large-format photographs and Moran's dramatic paintings.

Detailed Condition:

Minor toning. Trimmed at left side to the neatline for most of the map, as issued.
