Description:

Antique Map of America Showing the Island of California

Nice example of Seutter's map of America, with California as an island and two spectacular cartouches.

A highly detailed and richly engraved map. Seutter's maps are among the most packed with geographic detail, real and apocryphal.

The Great Lakes are very unusually shaped. A number of mythical western places are shown. South America is much too wide. The Mississippi is considerably west of its proper course.

Many other interesting features.
