### Scenographia Systematis Copernicani

**Stock#:** 64553op  
**Map Maker:** Cellarius  
**Date:** 1661 (1708)  
**Place:** Amsterdam  
**Color:** Hand Colored  
**Condition:** VG+  
**Size:** 20 x 17 inches  
**Price:** SOLD

#### Description:

Fine example of Cellarius's chart illustrating a heliocentric model of the universe, as proposed by the Polish astronomer Nicolaus Copernicus, in the first half of the 16th Century.

The present example is from the 1708 edition of Cellarius' *Harmonia Macrocosmica*, published by Valk & Schenk .

The map illustrates the Copernican system of the Universe, as described by Copernicus in his *De revolutionibus orbium coelestium* (On the Revolutions of the Celestial Spheres), published in 1543. His heliocentric model, with the Sun at the center of the universe, demonstrated that the observed motions of celestial objects can be explained without putting Earth at rest in the center of the universe. His work spurred further scientific investigations, becoming a landmark in the history of science that is often referred to as the Copernican Revolution.

Copernicus' heliocentric model of the Universe is perhaps the single most iconic and sought after of the charts published by Cellarius.

Andreas Cellarius was born in 1596 in Neuhausen and educated in Heidelberg. He emigrated to Holland in the early 17th Century and in 1637 moved to Hoorn, where he became the rector of the Latin School. Cellarius' best known work is his *Harmonia Macrocosmica*, first issued in 1660 by Jan Jansson, as a supplement to Jansson's *Atlas Novus*. The work consists of a series of Celestial Charts begun by Cellarius in 1647 and intended as part of a two volume treatise on cosmography, which was never issued.

**Scenographia Systematis Copernicani**

Cellarius' charts are the most sought after of celestial charts, blending the striking imagery of the golden age of Dutch Cartography with contemporary scientific knowledge.
