**Place:** n.p.  
**Color:** Color  
**Condition:** VG+  
**Size:** 16 x 20 inches  
  
**Price:** SOLD

**Description:**

***Exceptionally Rare Large-Format "Kodak Paper" Photograph.***

The Apollo 14 Lunar Module (LM) "Antares" is photographed against a brilliant sun glare during the first extravehicular activity (EVA-1). A bright trail left in the lunar soil by the two-wheeled Modularized Equipment Transporter (MET) leads from the LM. The photo was taken on February 5th, 1971. The photograph was taken in the Fra Mauro Highlands.

This is one of the large-format "Kodak Paper" color photographs, which were produced contemporaneously with the more famous, but much smaller, red-, blue-, and black-letter NASA photographs. The NASA-published 8x10s are rare in themselves, however, these larger photographs are much rarer still.

This photograph was printed in February 1971 or shortly thereafter.
