Map of the Country Adjacent To Puget Sound Embracing British Columbia and the Counties of Western Washington and also showing the Lines of Travel and Railways Complete and the Resources of the Country. Compiled from the Latest Records and Information

A remarkable advertising map issued to promote settlement, development and tourism. The map shows Puget Sound and the region to the east. The map south to include Mt. Rainier, which is drawn outside the map's neatline.

The map shows hydrography, railroads, Indian and government reservations, county and international boundaries, lighthouses, mineral resources and survey sections.

The Reference Key identifies Railways in Operation, Railways located and Constructed, Railways Projected, County Boundaries, International Boundaries and US Military, Naval and Light House Reserves. The map includes red overprinting, illustrating county lines.

The map is annotated in Orange (showing routes between major cities, etc.) and Blue (highlighting Seattle, Tacoma and Vancouver).

The map was prepared by Baker, Balch & Company of Seattle, in the year after Allan Balch moved to Seattle and joined the firm, after graduating from Cornell in 1889. The firm seems to have expanded well beyond Seattle. In the firm's entry in Who's Who in Engineering in 1922-23, the firm seems to have expanded throughout the west coast, where they did a tremendous amount of Gas & Electricity work and also represented a number of larger municipalities.

Rarity

We locate a single example (New York Public Library).

Detailed Condition:

Includes annotations in orange. The map is uniformly toned, with a bit more toning at the top and bottom.
