**Price:** SOLD

### Description:

#### *Flag of the Republic of Texas!*

Striking map of the World on Mercator's Projection, published by Ensign in New York.

The map is ringed with flags of the World, including the flag of the Republic of Texas, American Jack and American Commodore. The territories in the United States are of particular note:

- Texas is a Republic
- Massive Iowa Territory and Wisconsin Territory are shown.
- Oregon Territory extends north to 54° 40".
- Upper California is still part of Mexico
- Massive unnamed Indian Territory runs from the Red River to Canada
- 

At the top right is a list of "Geographic Epochs", listing the major voyages of discovery, focused on the discovery and exploration of America. In the center of the map is a list of recent discoveries in the Arctic by Captain John Ross, Lieutenant W. L. Parry and Captain John Franklin.

The results of early Antarctic explorations are plainly detailed with a lengthy note on discoveries in 1841.

Meticulous accounting of Captain James Cook's tracks in his 3 circumnavigations, along with the voyages of Wilkes (US Exploring Expedition), Vancouver and others.
